SMART SOLUTIONS FOR YOUR HOMES

A smart Wi-Fi integrated lighting system that ensures automatic illumination with colour and brightness control options to suit any occasion. .

A smart Wi-Fi integrated temperature based speed control system that automatically adjusts the speed of the fan according to the temperature of the room

We ensure that the room is at an optimum temperature with minimal manual intervention

Comfort ~ hands free illumination

Ambience ~ adjustable hues for different events

Adaptability ~ fine tuned brightness based on time of day

WHY SHOULD YOU AUTOMATE?

- Wi-Fi enabled system

- A long life span ~ economic and easy to handle

- You choose ~ switch on or switch off the lights from any part of your home

- Less manual work ~ Helpful for differently abled people

- Suitable for both offices and houses

- Change the colour of the lights based on your mood and aesthetic

- Learn about the current temperature details ~ decide whether to use the automatic mode or the manual mode
